## Introduction and Mission

FIXStrategy is a business consulting and solutions hub delivering innovative financial and enterprise services.

The FIXTrust initiative is a DeFi platform created to raise capital for FIXStrategy's strategic projects — with a special focus on clean energy — while offering tokenized financial services for enterprises.

This Version 2.0 evolves v1.0 (October 2025) by accelerating QTGen — our quantum hybrid generator — as the flagship product, directly funded with  $\geq 70\%$  of presale proceeds.

The FIXTrust initiative is a decentralized finance (DeFi) platform designed to raise capital for FIXStrategy's strategic projects, including clean energy initiatives, while introducing tokenized financial services for enterprises. This v2.0 evolves the v1.0 (October 2025) by accelerating the QTGen – our quantum hybrid generator – as a flagship utility, directly funded by 70% of presale proceeds to address global energy gaps for AI and off-grid communities.

The FIXTrust token (FIXT) presale aims to raise approximately US\$3.3 million to strengthen FIXStrategy's financial structure, enable modern financial products, and prototype QTGen for sustainable impact. FIXTrust fosters expansion and innovation, creating an ecosystem to attract investors and strategic partners through structured marketing and a transparent DeFi framework. This whitepaper outlines FIXTrust's vision, economic model, strategy, QTGen integration, and DEX alignment, emphasizing transparency, sustainability, and growth in enterprise tokenization.

---

## Problem and Justification

Enterprises face significant challenges in raising capital efficiently, transparently, and sustainably, particularly in innovative sectors like clean energy and modern finance. Traditional financing methods are bureaucratic, slow, and misaligned with the fast-paced technological market. The AI boom exacerbates this: data centers idle due to energy shortages (**Microsoft, Google admissions**), **crypto** mining crippled by high electricity costs, and 750M people worldwide without reliable power (ONU 2024).

There is a market gap for financial products combining decentralized governance, security, and real-world utility—key to earning investor trust and fostering community engagement. FIXTrust addresses this gap with a dynamic DeFi and tokenization-based fundraising solution tailored to corporate needs, regulatory frameworks, and now direct funding for QTGen to bridge energy deficits.

---

## Proposed Solution

FIXTrust is a sophisticated DeFi platform launching a presale of FIXT tokens, enabling investors to acquire tokens via ETH at a fixed price of US\$0.05 (evolved from v1.0 for market alignment), with a 10% bonus for early investors and anytime redemption options to ensure trust and liquidity.

The platform employs decentralized governance through a DAO, empowering the community to participate in strategic decisions, enhancing transparency and collaboration. Integration with Chainlink oracles ensures dynamic, reliable pricing, mitigating crypto market volatility risks.

Post-presale, FIXTrust will integrate with leading DEXs, such as Uniswap v3, ensuring global liquidity. Core evolution in v2.0: QTGen – Quantum Hybrid Generator, a family of 1-7.5 kVA generators using betavoltaic cells (50-100 years sustain) + 12/24V starter battery for boot, targeting camping, homes, data centers, and humanitarian kits. 70% of proceeds fund prototyping; revenues yield holder dividends.

---

## QTGen Architecture (Hybrid for Feasibility)

Component	Function	Lifespan
----- ----- -----		
Starter Battery 12/24V	Instant boot + torque	8-12 years (betavoltaic)
Betavoltaic Cell	Constant recharge + rotor sustain	50-100 years
Halbach Rotor + Neodymium Magnets	Continuous generation	50+ years
Ceramic/Magnetic Bearings	Near-zero friction	10-15 years
220V Pure Sine Inverter	Plug-and-play output	20+ years

---

## Product Line (2026 Launch)

Model	Power	Weight	Use Case	Target Price
-----	-----	-----	-----	-----
QTGen 1.0	1 kVA	~15kg	Camping/Expeditions	\$1,499
QTGen 1.5	1.5 kVA	~18kg	Small Home/Backup	\$1,999
QTGen 3.5	3.5 kVA	~32kg	Residence/Office	\$3,799
QTGen 7.5	7.5 kVA	~62kg	Data Center Rack	\$8,799

## QTGen Light Foundation:

5% of all produced units will be donated.

2030 Goal: 10.000 free kits delivered in Northeast Brazil, Amazon, Nigeria, Kenya, Ghana and Haiti.

---

## FIXTrust Smart Contract

The FIXTrust smart contract is an ERC20 token written in Solidity (v0.8.20), deployed on Ethereum Mainnet at 0x3bEd414F434A5E1FcCf9fe0FFbD8Eb6Cf1FdFC98. It facilitates secure presale with:

**Fixed Price:** US\$0.05 per FIXT.

**Bonus:** 10% for early investors.

**Redemption:** Anytime ETH proportional to USD value.

**Hard Cap:** 825 ETH (~US\$3.3M).

**Presale Address:** 0xef7d0e46525b7ba7e72ff40dc31caf2f160483b6 (Start: 09/11/2025; End: 30/11/2025).

The contract leverages OpenZeppelin for security, Chainlink for pricing, verified on Etherscan, tested, and audited Q4 2025.

Key Functions: deposit() for minting; redeem(tokenAmount) for burning/ETH return.

---

## Integration with Decentralized Exchanges (DEXs)

FIXTrust's DEX integration ensures liquidity post-presale. Q1 2026 listing on Uniswap v3 (Router: 0xE592427A0AEce92De3Edee1F18E0157C05861564) and SushiSwap.

**Liquidity Strategy:** 15% presale tokens + 75 ETH for ETH/FIXT pool; USDC/FIXT on Curve.

**Incentives:** 5% supply for LP rewards (8-12% APY staking); early LP bonus 5%.

---

## Tokenomics

**Token Name:** FIXTrust | Symbol: FIXT | Decimals: 18 | Total Supply: 100M (fixed, minted via presale).

### Distribution:

70% Public Sale (0x254a4287d8e170e007ef02e6329ba53224043e26),

20% Presale (0xef7d0e46525b7ba7e72ff40dc31caf2f160483b6),

10% Reserve (0x3bEd414F434A5E1FcCf9fe0fFbD8Eb6Cf1FdFC98).

**Utility:** DAO governance, QTGen dividends (30% revenues in USDT via staking at 0xdcb23c7Eb4A14C09545a326A1874c959ab8c93Ee), redemption.

**Incentives:** 10% presale bonus; 5% liquidity mining; burn on redemption.

**QTGen Revenues:** 50% buyback/burn, 30% dividends, 15% expansion, 5% donations.

---

## Changelog v2.0 (vs v1.0)

This version represents a strategic evolution of the project while keeping 100% of the original structure (contract, supply, presale):

- Acceleration of QTGen as the main utility (funded  $\geq 70\%$  by the presale)
  - Price adjusted to US\$ 0.05 (aligned with current Uniswap market)
  - Tokenomics expansion with QTGen revenues (50% buyback/burn + 30% USDT dividends)
  - Roadmap updated with functional prototype in Jan/2026 and goal of 10.000 humanitarian donations by 2030
- 

## Decentralized Governance

DAO via Snapshot/Tally for holders: Adjust DEX fees, new pairs, QTGen reinvestments. Aligns with FIXStrategy goals.

---

## Roadmap

- **Q4 2025:** Presale close, audit, DAO launch, QTGen patent provisional.
  - **Q1 2026:** DEX listings, QTGen prototype video, staking live.
  - **Q2 2026:** 1inch partnerships, QTGen pilot production.
  - **Q3 2026:** Brazil launch (Decathlon), humanitarian kits.
  - **2027:** Global scale, 15-30 kVA models, 100K donations by 2030.
- 

## Team and Partnerships

Led by FIXStrategy team (LinkedIn: <https://www.linkedin.com/in/marciovillela/> – Founder with enterprise consulting/blockchain exp). Advisors in DeFi/energy. Partnerships: Asian betavoltaic suppliers; DeFi communities (X @FixTrust69128, TG t.me/FIXTrustOfficial). Marketing: AMAs, influencers for QTGen hype.

---

## Legal and Compliance Aspects

FIXTrust complies with regulations; DYOR. Not financial advice. QTGen prototypes follow Inmetro/Anatel standards.

---

## Risks and Mitigations

**Technical:** OpenZeppelin/Chainlink + Q4 audit.

**Market:** Hard cap, stable pairs.

**Operational:** DAO governance.

**QTGen-Specific:** Hybrid feasibility tested with engineers (WEG consult); prototype Jan 2026 mitigates.

**DEX Risks:** Concentrated ranges minimize IL; Forta monitoring.
